C. Comment: This enzyme is responsible for the ganglioside pattern in tissues.
C. Superfamily: alpha-N-acetylneuraminate alpha-2, 8-sialyltransferase
C. Keywords: glycoprotein; glycosyltransferase
C. Keywords: glycoprotein; glycosyltransferase
F.13-47-Aromain: transmembrane #status predicted <TMM>
F.120-168/Region: sialyl motif
F.258-280/Region: sialyl motif
F.556,104,199,230/Binding site: carbohydrate (Asn) (covalent) #status predicted
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  119 roLeuLysLysCysAlaValValGlyAsnGlyGlyIleLeuLysMetSer 135
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             168

Nylternate names: GD3 synthase
C; Species: Rattus norvegicus (Norway rat)
C; Accession: JC4973
R; Zeng, G; Gao, L; Ariga, T; Yu, R.K.
Biochem: Blochem: Blophys: Res. Commun. 226, 319-323, 1996
A; Title: Molecular cloning of CDNA for rat brain GD3-synthase.
A; Reference number: JC4973; MUID:96400257
A; Accession: JC4973
A; Molecule type: mRNA
A; Residues: 1-359 <ZENA

beta-galactoside alpha-2,3-sialyltransferase (EC 2.4.99.4) - mouse
C; Species: Mus musculus (house mouse)
C; Date: 22-Jan-1994 #sequence_revision 13-Mar-1997 #text_change 24-Sep-1999
C; Accession: S36824
R; Lee, Y.C.; Kurosawa, N.; Hamamoto, T.; Nakaoka, T.; Tsuji, S.
Eur. J. Blochem. 216, 377-385, 1993
A; Title: Molecular cloning and expression of Gal-beta-1,3GalNAc-alpha-2,3-sialyltrans
A; Reference number: S36824; MUID:93387288
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      A; Accession: S36824
A; Status: preliminary
A; Molecule type: mRNA
A; Residues: 1-337 <LEE>
A; Cross-references: EMBL: X73523; NID:9402214; PIDN:CAA51919.1; PID:9402215

Gal beta 1,3(4)GlcNAc alpha 2,3-sialyltransferase - rat

Gal beta 1,3(4)GlcNAc alpha 2,3-sialyltransferase - rat

Cspecies: Rattus norvegicus (Norway rat)

C;Species: Rattus norvegicus (Norway rat)

C;Accession: A45074

C;Accession: A45074

J. Biol. Chem. 257, 21011-21019, 1992

A;Title: Primary structure of Gal beta 1,3(4)GlcNAc alpha 2,3-sialyltransferase determin sferase gene family.

A;Reference number: A45074; MUID:93016017

    Patent No. 6218161
    Patent No. 6218161
    APPLICANTION:
    APPLICANT: Shuichi TSUJI et al.
    TITLE OF INVENTION: NOVEL SUGAR-CHAIN SYNTHETASE AND PROCESS FOR
    TITLE OF INVENTION: PRODUCING THE SAME
    NUMBER OF SEQUENCES: 8
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                228 GlyPheThrValAsnThrMetLysAsnSerLeulleAlaTyrGluAlaTy 244

Sequence 25, Application US/09334601

Patent No. 6280989

GENERAL INFORMATION:

APPLICANT: Kapitonov, Dmitri

APPLICANT: Yu, Robert

TITLE OF INVENTION: NOVEL SIALYLTRANSFERASES

FILE REFERENCE: VCUIP-6

CURRENT APPLICATION UNMER: US/09/334,601

CURRENT FILING DATE: 1999-06-17

NUMBER OF SEQ ID NOS: 94

SOFTWARE: PatentIn Ver. 2.0

SEQ ID NO 25

LENGTH: 90
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Length:
